

## Environmental Policy

It is the policy of our Company to give Environmental issues the highest priority. We provide static and mobile guarding and key holding services and will undertake this work strictly in accordance with the provisions of all current and applicable legal and regulatory requirements as well as any other requirements subscribed to by KRM Security Services Ltd.

We are committed to minimising the environmental impact of our operations by continually monitoring and improving our interaction with the environment. In particular we will achieve this through the implementation and maintenance of an environmental management system in line with the expectations of ISO 14001:2004 based on our commitment to:

- Ensure that the environmental effects of our operations are assessed and monitored in the planning, implementation and operational stages
- Identify the environmental aspects of our operations that have the potential to impact negatively on the environment. Where these do impact, all measures within KRM Security Services Ltd (human, financial, & technical resources) will be taken into account to mitigate them in order to be within the requirements of Environmental Standards and Regulations that are designed to prevent and minimise both the hazards and volume of waste streams.
- Assess the environmental standards and practices proposed for planned projects and achieved by operational projects.
- The company will use its best efforts to ensure efficient and sustainable utilisation of its environmental resources (water, fuel and land) to reduce the volumes of waste to be treated and emissions to the environment. It will also work to reduce waste from processing operations, by utilising or recycling certain waste, as far as reasonably practical.
- Recognising that protection of the environment is dependent on the entire workforce, will conduct training on the environmental aspects of the company operations, thereby creating and implementing measures to prevent or mitigate any negative, environmental impact. This is to ensure that a safe and healthy environment is maintained for employees, their dependents and adjacent communities.

These ideals assist in setting and reviewing the environmental objectives and targets. KRM Security Services Ltd will monitor this policy and update it to reflect future developments.
